Company Profile

U&I Construction is a renowned, reliable, and top-of-the-line construction company, dealing in the complete course of construction and architecture services.

We not only build residential and commercial buildings for you but ensure these last with your life. The skilled, experienced, and professional team members work in collaboration with the clients to understand their unique needs and come up with the most cost-effective yet innovative construction and architectural solutions. If you want to turn your dreams into reality, it is the prime time to consider it done. We will chat, meet, and decide when to start renovating or constructing your house or office.

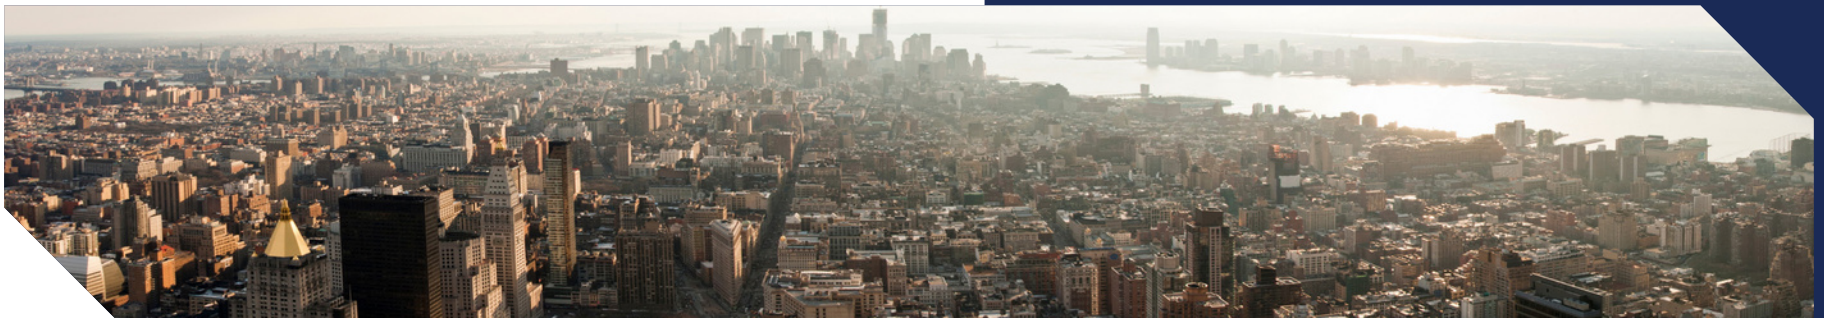

CEO Message

In this era of the digitalized world, we have come up with an online platform to provide you with a one-for-all-problems' solution related to construction, renovation, and interior or exterior design. We are sparing you from the hassle of singling out an unreliable party that can cost you fortunes.

All we have right now is our customers' satisfaction and trust that keeps them relying on us as well as keeps us providing them with top-of-the-line services that can last for life. There is no need to face any hassle in travelling to the market in search of a reliable constructor or architecture.

Our team includes architects, engineers, consultants, interior or exterior designers, and planners who work with utmost coordination to make your dreams come true.

Our Vision

Our clients' trust in us matters the most for us and we take everything into account to maintain it. We aim to provide matchless construction and architectural solutions that can not only prove cost-effective but also ensure reliability, durability, and safety.

Our Mission

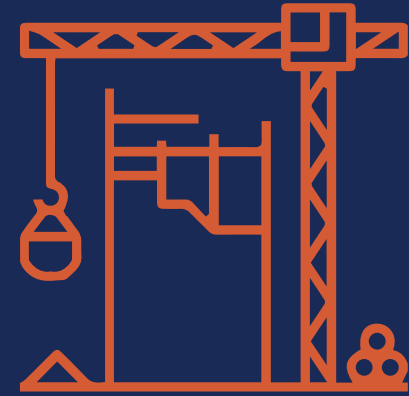

U&I Construction is a company that has now become the main talk of the town when it comes to the one-stop solutions for construction, architecture, and interior or exterior design. It is becoming benchmark of trust, integrity, and durability.

On the standing minute of time, we are providing our services all over Pakistan empowering cost-effective yet quality construction. You can trust us blindly as we never cast a slur on what we do.

Professional Services

We cover everything related to construction, renovation, and interior or exterior designing.

Reliability, durability, and quality is our priority. From the first inch of bottom to top, we believe in investing in the top-of-the-line material to make everything last for life.

Nothing is more important for us than our clients' satisfaction.

We do not build your houses but our company's future, so do not worry about the quality or reliability.

Pre Cast Material

We are considered a renowned company for concrete building materials, and one of our concrete products, Precast Boundary Wall, is in high demand nationwide. We are manufacturing aesthetically appealing precast wall panels, beams, Security barrier , Pavers and boundary walls for three decades while serving numerous clients daily. We use fine quality raw materials in the manufacturing of prestressed precast H- Column, Planks, Strips, and Caps that not only enrich the appearance of your surroundings and furnish the purpose of protection from unwanted peeking into your private areas.

Architecture & Interior

We optimize your space creatively and convert it into a luxurious, cozy, and lovable place, which undoubtedly includes twenty-four-seven hard work of our creative artists and engineers. Our work starts with Project Inspection, where we pen down all our clients' requirements as a draft copy. Our team of expert architects does extensive Site Analysis to identify any possible issues in the location, site area that can negatively impact the existing design and prepare proposals accordingly. In the Design and Development phase, we make different design plans while considering the dreams our happy clients want to build. With Structure Designing Solution, we provide the best cost and material analysis of your buildings. It includes the feasibility reports of grey-structure, pre-engineered buildings, steel structures, and the selection of reinforced concrete and refined raw materials.
